

OGD30D

OTOMATİK KLİMA GAZ DOLUM CİHAZI
AUTOMATIC REFRIGERANT
CHARGING MACHINE

Program and automatically pull vacuum ,electronic leak test and transfer refrigerant to the A/C system.

1. VACUUM

Once the program time has ended the vacuum pump will shut off and the machine goes to step 2 .

2. ELECTRONIC VACUUM LEAK TEST

Vacuum Sensor Integrated

3. CHARGING

The unit will automatically stop the flow of refrigerant when the programmed charge is complete.

The unit will also let you know if there is not enough refrigerant in the cylinder to supply the current charge.

4. DIGITAL HIGH AND LOW PRESSURE GAUGE

2x16 Character LCD Display

Electronic Scale 20 kg +/- 10 gr

Power: 220 V/50Hz

Vacuum Pump: 2,5 m³/h

Ultimate vacuum: 0,05 mbar

ON-BOARD OIL INJECTOR: *Lets you replace the lost oil at the push of a button.*

MAINTENANCE PROMPTS: *Vacuum pump oil change*

Accurate, continuous tracking of charged refrigerant.
